

JABRA+ FOR ADMINS

# Remote meeting room management at your fingertips

Remote reboot of device shown

## EASY REMOTE ROOM MANAGEMENT

Jabra+ for admins makes it easy to keep an eye on all your meeting rooms and Jabra PanaCast 50 devices no matter where you are in the world. This secure, next-generation platform enables you to quickly locate, diagnose and fix any problems, saving your IT resources and helping your team enjoy seamless meetings.

## FULLY SCALABLE

Whether you have a few rooms or a global network of rooms, Jabra+ for admins is a scalable tool that makes room management a breeze. Meeting spaces all over the world? No problem. You can get a real-time global overview of all your rooms or drill down to a specific location or device. Plus, you can set different access levels for your IT team, giving them just the right tools they need to support your video setups.

## CUSTOMIZE YOUR WAY

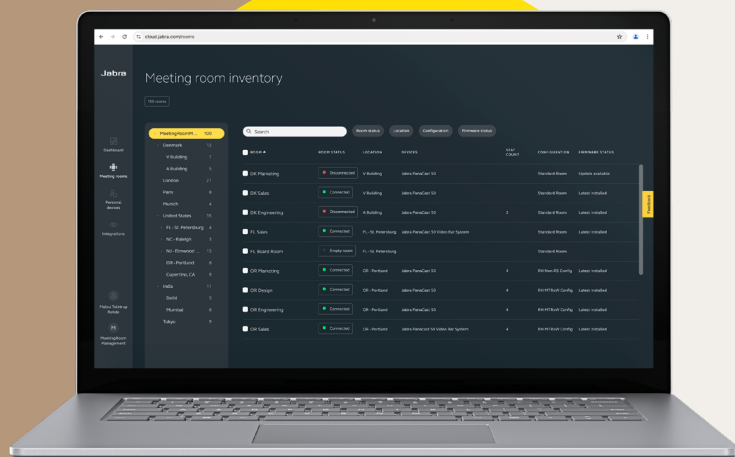

Jabra+ for admins is all about making your life easier. Thanks to valuable feedback from our customers, we've built a user interface that's intuitive and super flexible. Want to see things your way? No problem! Just drag and drop to organize your setup by location, group, or individual device for easy room management and real-time insights.

## THE SPEEDIEST OF SETUPS

Jabra+ for admins makes room management fast and efficient. Flexible provisioning options enable you to set up devices in bulk or one at a time – whatever works best for you. And once everything is up and running, the platform helps you keep your devices performing at their best without any hassle.

## REAL-TIME ROOM MONITORING

Keep a close eye on your meeting rooms with a real-time overview of every device, with color-coded status and health indicators to let you know when it's time to take action. Troubleshoot issues from wherever you are to minimize downtime and cut down on IT support tickets. You can dive into detailed device information, tweak settings, and even reboot devices remotely, removing the need for local IT staff to conduct on-site visits.

## SIMPLE MASS MANAGEMENT

Jabra+ for admins makes managing your meeting rooms easy right from your room inventory dashboard. Whether you're updating configurations across the board or customizing specific rooms, you can handle it all in a few clicks. Choose a standard setup and keep things simple or customize to suit different needs. Once you're set up, simple reporting stats help you keep tabs on room performance over time to stay on top of things.

## EASILY UPDATE YOUR DEVICES

Effortlessly update your devices with the latest experiences to get the most from your investment. Jabra+ for admins alerts you to new updates and lets you apply them to multiple devices all at once. Want to test things first? You can limit updates to just a few rooms to test new firmware safely before a full rollout. Plus, you can schedule updates for after-hours to avoid disrupting meetings; and if a room is in use, Jabra+ for admins simply reschedules the update to minimize disruption to your team.

## HIGHLY SECURE

Jabra+ for admins is built on Microsoft Azure and is highly secure. It features end-to-end encryption and single sign-on integrations, making it easy and safe for your teams to access and collaborate from anywhere. We take privacy seriously, which is why Jabra+ for admins meets all GDPR requirements and undergoes regular security assessments and updates to assure robust protection and compliance.

## COMPLEMENTS OTHER PLATFORMS

Use Jabra+ for admins for all your meeting room management needs or to complement other tools like Microsoft Pro Management Portal and Zoom Device Manager with advanced troubleshooting for Jabra devices. The choice is yours.

## EXTEND YOUR ROI

Jabra+ for admins blends cutting-edge innovation with our technological expertise to give you a trusted, comprehensive platform. It's designed to help you effortlessly manage your PanaCast 50 devices, keeping them in peak condition for the long haul. It also introduces exciting new features through firmware upgrades to address the latest meeting challenges and extend the value of your Jabra investment.

## MANAGE MORE JABRA DEVICES

Right now, Jabra+ for admins is your go-to platform for meeting room management, but get ready – coming soon, you'll also be able to manage your Jabra enterprise headsets and speakerphones using the same platform. This expansion means you can seamlessly oversee your entire suite of Jabra devices, simplifying your management tasks with one powerful platform.
